

2022 RoboDogs Summer Camp 5th-8th Grade

Summer Camp: Camp is a fun and challenging adventure where students get the opportunity to design & build their own robot for a new challenge each day. Programming will run the gambit of basic movements to advanced programming using sensors.

Who: Students from 5th thru 8th grade for the 2022/23 school year are eligible.

When: June 13th - 16th from 8:30 – 11: 00.

Where: Camp will be held in the BMS cafeteria.

What is the RoboDogs Team?

The team is made up of dedicated students that want to be part of an elite team representing the Bettendorf Schools in First Lego League. <https://www.firstlegoleague.org/about>. Students will program robots, learn and implement a research project, work as a unified team to compete in a regional, state and possibly national competition. We use camp as a way to select the RoboDogs team. Students do not have to want to be part of the team to come to camp.

Advisor: Shannon Budde (sbudde@bettendorf.k12.ia.us) & Aaron Maurer
Feel free to contact me with any questions.

We want all students to be able to participate, so if financing is an issue please let us know.
