This preschool program is designed to help prepare your child for Kindergarten. Children will learn to recognize and write uppercase and lowercase letters, count and recognize numbers 1-20, problem solve, make simple science predictions, as well as learn about famous artists and places around the world. Social and emotional awareness is also a key part of this program. On Fridays the children will practice creative movement and have a 30 minute music lesson, which incorporates knowledge of composers, simple music notes, and musical concepts. We have two classrooms with one teacher each and a maximum enrollment of ten children per class. Small class sizes allow for a better learning environment and individualized attention.

This class is a must for kindergarten readiness. Exposure to letters, beginning and blended sounds, words, punctuation, parts of a book, authors, illustrators, and much more! This pre-reading class will lay the groundwork for future success in reading and writing. Class concludes in May with the children writing and illustrating their own stories. We have two classes with one teacher in each class and a maximum enrollment of 10 children per class. Small class sizes allow for a better learning environment and individualized attention. This class is a perfect add-on to your child's morning Preschool class.

We offer Spanish too!

Children who sign up for our 4-year-old Program and add Literally Yours will bring a lunch from home and participate in a supervised 45-minute recess and lunch on Mondays and Wednesdays. This is a great opportunity to extend the day, build up stamina for kindergarten, learn the lunch routine, and work on pre-reading skills.

Introduce your child to Spanish through our comprehensive, year-long exploration of language and culture. Taught by Valerie Alves, an experienced preschool instructor and native Spanish speaker, this unique program uses a creative hands-on curriculum to build language skill. A wide variety of activities including games, music, and group interactions build vocabulary that reinforces and encourages successful communication in Spanish. A number of research studies have shown that children who have learned a second language at a young age demonstrate cognitive advantages such as increased problem-solving skills and creativity. Children also develop an interest in and curiosity about different cultures. This class enrolls a maximum of 10 students. Small class sizes allow for a better learning environment and individualized attention.

**This class is a great add-on to our 3- and 4-Year-Old Early Learning Preschool Programs!
Children who attend Spanish at 9:00 am will be walked to their preschool classroom at 10:00 am.**
